PWR DRIVE STR Dimensional Lumber Structural Screw Ideal For Deck Framing

The design of the STR is specific to dimensional lumber used in deck structures and any other framing needs, which allows maximum assembly strength. By figuring out all the possible assemblies of a structure, using a mix of 2" x 6", 2" x 8", 2" x 10", 4" x 4", and 6" x 6", you can cover all possible combinations with only five different lengths of the STR. Fewer screws are necessary to cover anything you may encounter on the jobsite. Each pack of STR includes a handy reference for the correct lumber combinations ideal for a specific length plus the required T-40 bit.

Strengthen Your Structures with Outdoor Accents® Hardware

With the Outdoor Accents Avant Collection™, a new line of decorative wood connectors and fasteners from Simpson Strong-Tie, you can bring both elegant design and structural strength to your outdoor living areas. This versatile hardware accommodates nominal and rough lumber sizes, providing the flexibility you need when designing and building custom outdoor structures.
